

## **Resolution**

### **TIGHTENING SANCTION AGAINST IRAN CONCERNING THE REGIME'S NUCLEAR WEAPONS PROGRAMME**

*Presented by Junge Union (Germany) & Jeunes Populaires (France)*

*Adopted at the YEPP Chairmen's Conference*

*Paris 8<sup>th</sup>-11<sup>th</sup> April 2010*

#### **Considering that:**

- Iran's uranium enrichment programme has developed beyond merely peaceful intentions and serves as an instrument of the regime's hegemonic ambitions in the region
- Iran permanently tries to mislead the international community about the real purpose of the enrichment programme so that the international community has meanwhile no reason to trust the current leaderships lip service
- an Iranian nuclear weapons program may trigger a broad nuclear arms race in the Middle East which would seriously undermine the regional and international security
- Iran in possession of nuclear weapons would stand for an existential threat to the state of Israel
- the already existing bi- and multilateral sanctions haven't contained Iran's nuclear ambitions to a sufficient degree up to now
- the agreement signed by the presidents of the United States and Russia for a world free of nuclear weapons in April 2010
- the new technology introduced by Iran that speeds up six times the Uranium enriching process

#### **Referring to:**

- the "Treaty on the Non-Proliferation of Nuclear Weapons" (NPT) which has been signed by Iran in 1968
- the IAEA report "Implementation of the NPT Safeguards Agreement in the Islamic Republic of Iran" of February 18th 2010 that confirms Iran's high potential to construct nuclear weapons
- the United Nation's security council's resolutions 1737, 1747, 1803 and 1835 which have already imposed sanctions on Iran due to the

regime's non-cooperation with the IAEA and the international community

**YEPP calls the EU and all its member states to:**

- pressure Iran to full compliance with the NPT and the existing UN resolutions mentioned above
- invite Iran to restart the human rights dialogue with the EU which was cancelled by the regime in 2006
- make Iran's peaceful attitude towards uranium enrichment the precondition for any further economic cooperation with the EU
- encourage China and Russia to support all sanctions the UN security council may adopt in future to stop Iran from developing nuclear weapons
- make sure that possible sanctions are clearly targeted at the regime and cause as few problems as possible to the population
